

SustainableStone™ for Outdoor Living

SustainableStone™ for Outdoor Living

For over ten years, RAINROCK® has been developing high quality garden accessories that are unique, functional and environmentally conscious. Our goal has always been to enhance the lives of garden enthusiasts by providing exceptional products for both indoors and out with the added peace of mind that we care about the environment as much as they do.

This year, we are taking the next step by introducing our new SustainableStone™ material across our product line. SustainableStone is a revolutionary new material, unmatched in its sustainability while offering distinct advantages in weight and strength versus traditional materials. We invite you to explore this new catalog to learn more and hope you enjoy the products as much as we have enjoyed creating them. Our new line includes five categories of products, all produced with our revolutionary SustainableStone:

- Deck & Patio products that can be used for most planting applications
- Accessories to enhance the beauty of our pots and your garden
- Water Features to invite nature in and bring life to outdoor spaces
- Entryway Pots that make stunning architectural statements
- Petite Pots to bring the garden indoors

Each piece is meticulously tested for functionality and designed with convenience and durability in mind. Rainrock's unique designs and our new material combine into one-of-a-kind environmentally conscious garden accessories. Functionality, originality, quality and sustainability continue to remain the most important features of RAINROCK products.

Warm regards,

Laura Broyhill  
Founder

## About SustainableStone™

SustainableStone™, the new proprietary eco-stone material used in all RAINROCK products, offers significant benefits to consumers through high strength, reduced weight and near 100% sustainability. SustainableStone is made from reclaimed and recycled materials that can be molded into unique products.

Our product formulation combines recycled container glass and industrial by products such as fly ash and blast furnace slag, resulting in a structural grade concrete that is near 100 % recycled.

SustainableStone offers noticeable benefits to your customers:

### **Weight:**

- Lighter than typical concrete
- Benefit: Lower cost shipping and distribution costs, easier handling

### **Strength:**

- Stronger than typical concrete
- Benefit: Lower breakage risk

### **Sustainability:**

- Up to 98% use of green, recycled and sustainable materials.
- Benefit: Environmentally friendly, low energy manufacturing, US jobs

Our proprietary formulation does not include any Portland cement so the carbon footprint is significantly less than our competitors. We also employ manufacturing and distribution processes designed to be as environmentally conscious as possible, including:

- Manufacturing waste reuse in the product line
- Low energy manufacturing with less water use
- Sustainable mold making process
- Locally sourced sustainable ingredients
- Reduced to-market shipping costs

RAINROCK products are proudly made in the US in Bozeman, MT.

# Deck & Patio Pots

Developed to fit the size and feel of any deck or patio, this line of unique pots and saucers is available in five shapes with small, medium and large size options. From the sleek silhouette of our tapered square and rectangular pots to traditional bowl and egg shapes, these pots are large enough to hold dramatic arrangements and make a bold statement. All deck and patio pots come with drainage saucers and are frost resistant for year round use.

Available in four color options: Ash, Mahogany, Sand and Obsidian. Sold in sets of three.
